Description of the qualification

Master of Science in Human Resource Management

The MSc in Human Resource Management is designed to provide graduates with specialist skills, knowledge, and capabilities in the discipline of human resource management. It will provide a route to professional membership of the Chartered Institute of Personnel and Development (subject to the Institute's approval). It also provides training in academic and research skills as preparation for further study and research in the field of human resource management. 1/6 of study will have been in optional subjects, in topics appropriate to HR management. The qualification is completed with a dissertation providing evidence of research skills.

Understanding this statement

Credit points and levels

The University uses a credit system, where 120 credits is equivalent to a full-time academic year. This system is compatible with credit accumulation and transfer schemes in most Higher Education institutions in England, Wales and Northern Ireland, and with the Scottish Credit and Qualifications Framework (SCQF) in Scotland. The workload rating of each module is also given in terms of the European Credit Transfer System (ECTS). Credit for undergraduate work is awarded at one of three Open University levels (1, 2 and 3). Credit at other levels, including postgraduate-level work, is designated level X.

Method of teaching

Modules are taught by an integrated process using material in written, audio and visual media formats which could include set books. Students normally have a tutor and there may be local or online tutorial sessions, but attendance is voluntary. On some modules, students might also have to attend a residential school.

Student performance

Student performance is normally assessed through a series of assignments that are either marked by the tutor or by computer, to standards set by the Module Result Panel. For most modules, there's also either a written exam or a piece of written work like a project or dissertation. The final module result depends on the performance in the assessed tasks.

Student results for each module are decided by the Module Result Panel (MRP), on behalf of the University Senate. Each MRP is made up of a Chair and internal examiners. The standards adopted by the MRP are scrutinised and approved by an external examiner in line with QAA guidelines. QAA is the quality management arm of the Government's funding body for higher education (HE). External examiners are senior academics from outside the University, usually from another university or institute of higher education.
